active_fulfillment	Active Merchant library for integration with order fulfillment services	2009-10-06T17:29:31Z
active_merchant	Active Merchant is a simple payment abstraction library used in and sponsored by Shopify. It is written by Tobias Luetke, Cody Fauser, and contributors. The aim of the project is to feel natural to Ruby users and to abstract as many parts as possible away from the user to offer a consistent interface across all supported gateways.	2011-06-16T00:30:43Z
bookmasters_ruby	A class for interfacing with the Bookmasters Webservice	2008-08-08T17:03:46Z
